Note about Non-GAAP Financial Measures

QAD has disclosed non-GAAP adjusted EBITDA, non-GAAP adjusted EBITDA margins, non-GAAP pre-tax income and estimated income tax expense on GAAP earnings in this press release for the third quarter and first nine months of fiscal 2019. These are non-GAAP financial measures as defined by SEC Regulation G. QAD defines the non-GAAP measures as follows:

- Non-GAAP adjusted EBITDA - EBITDA is GAAP net income before net interest expense, income tax expense, depreciation and amortization. Non-GAAP adjusted EBITDA is EBITDA less stock-based compensation expense and the change in the fair value of the interest rate swap.
- Non-GAAP adjusted EBITDA margins - Calculated by dividing non-GAAP adjusted EBITDA by total revenue.
- Non-GAAP pre-tax income - GAAP income before income taxes not including the effects of stock-based compensation expense, amortization of purchased intangible assets and the change in fair value of the interest rate swap.
- Estimated income tax expense on GAAP earnings - Defined as GAAP total tax expense excluding changes in reserves for unrecognized tax benefits.

QAD's management uses non-GAAP measures internally to evaluate the business and believes that presenting non-GAAP measures provides useful information to investors regarding the company's underlying business trends and performance of the company's ongoing operations as well as useful metrics for monitoring the company's performance and evaluating it against industry peers. The non-GAAP financial measures presented should be used in addition to, and in conjunction with, results presented in accordance with GAAP, and should not be relied upon to the exclusion of GAAP financial measures. Management strongly encourages investors to review the company's consolidated financial statements in their entirety and to not rely on any single financial measure in evaluating the company.

Tables providing a reconciliation of the non-GAAP measures to their most comparable GAAP measures are included at the end of this press release.

QAD non-GAAP measures reflect adjustments based on the following items:

Stock-based compensation expense: The company has excluded the effect of stock-based compensation expense from its non-GAAP adjusted EBITDA and non-GAAP pre-tax income calculations. Although stock-based compensation expense is calculated in accordance with current GAAP and constitutes an ongoing and recurring expense, such expense is excluded from non-GAAP results because it is not an expense which generally requires cash settlement by QAD, and therefore is not used by the company to assess the profitability of its operations. The company also believes the exclusion of stock-based compensation expense provides a more useful comparison of its operating results to the operating results of its peers.

Amortization of purchased intangible assets: The company amortizes purchased intangible assets in connection with its acquisitions. QAD has excluded the effect of amortization of purchased intangible assets, which include purchased technology, customer relationships, trade names and other intangible assets, from its non-GAAP pre-tax income calculation, because doing so makes internal comparisons to the company's historical operating results more consistent. In addition, the company believes excluding amortization of purchased intangible assets provides a more useful comparison of its operating results to the operating results of its peers.

Change in fair value of the interest rate swap: The company entered into an interest rate swap to mitigate its exposure to the variability of one-month LIBOR for its floating rate debt related to the mortgage of its headquarters. QAD has excluded the gain/loss adjustments to record the interest rate swap at fair value from its non-GAAP adjusted EBITDA and non-GAAP pre-tax income calculations. The company believes that these fluctuations are not indicative of its operational costs or meaningful in evaluating comparative period results because the company currently has no intention of exiting the debt agreement early; and therefore over the life of the debt the sum of the fair value adjustments will be \$0.
